

GANPAT UNIVERSITY

**B. TECH. SEMESTER III ELECTRONICS & COMMUNICATION ENGINEERING
REGULAR EXAMINATION, NOV-DEC 2012**

2EC305 NETWORK ANALYSIS

Time: 3 HOURS.

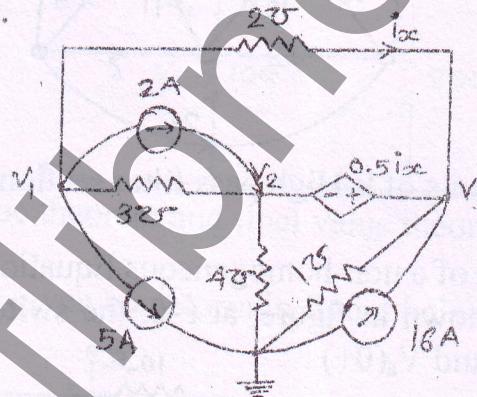

TOTAL Marks: 70

Instructions:

1. Attempt all questions.
2. Answers to the two sections must be written in separate answer books.
3. Figures to the right indicate full marks. Assume suitable data, if necessary.

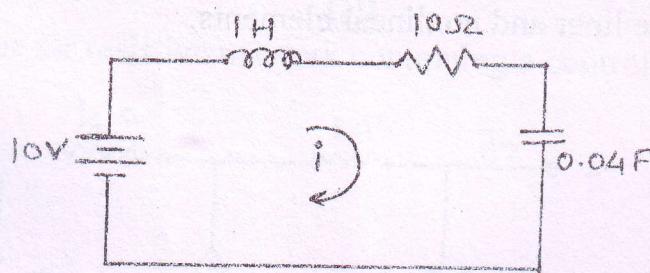

SECTION-I

- Q.1 (A)** What is the Source transformation and give the Network Simplification 6 techniques with an example.
- (B)** Determine the node voltage V_1 , V_2 and V_3 in a network of Figure using 6 Supernode Concept.

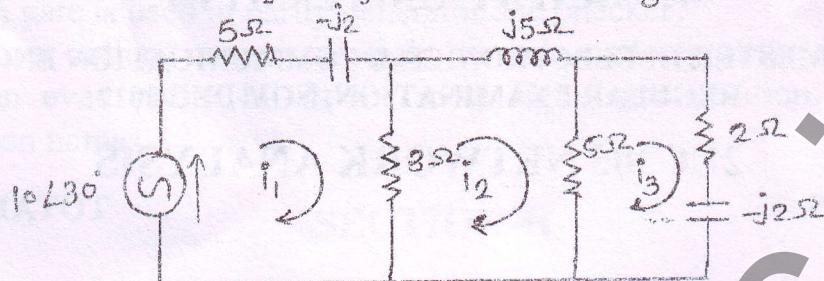

OR

- Q.1 (A)** Explain the classification of Different type of Active filter with necessary 6 Figure.
- (B)** In the circuit of figure, a D.C Voltage of 10v suddenly applied to a series circuit consisting of RLC Component .Obtain the Particular Solution for current $i(t)$ in the Circuit. 6

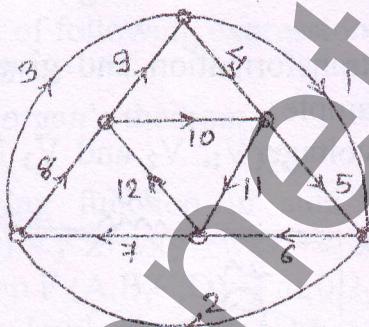

Q.2 (A) Find the mesh Currents I_2 and I_3 in a network of figure.

(B) Define graph, tree, link and loop and tree branch voltage with Example. 5

OR

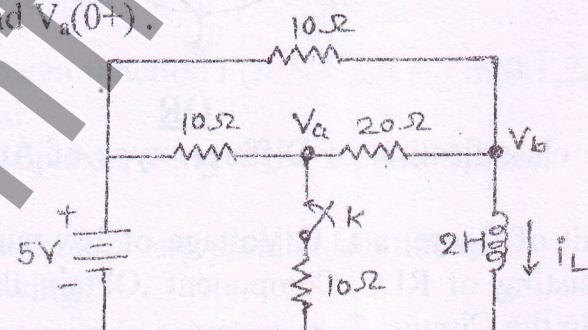

Q.2 (A) In the given network Figure obtain values of branches currents & voltages by cut-set schedule. 6

(B) Explain the elements of k-High pass filter section. 5

Q.3 (A) Find the Solution of a non-homogeneous Equation Using Integrating factor. 4

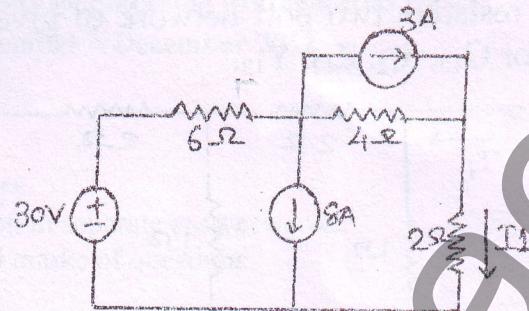

(B) In the network shown in figure, at $t=0$, the switch is Closed, determine the values of $V_a(0^-)$ and $V_a(0^+)$. 6

(C) Define the liner and nonlinear elements. 2

SECTION-II

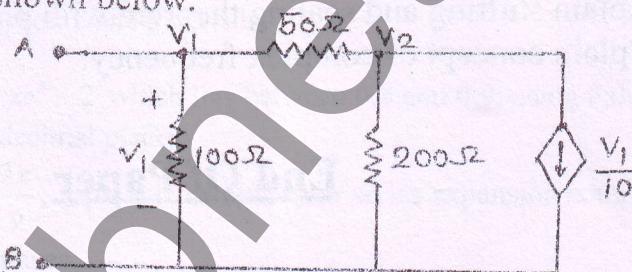

- Q.4 (A)** State Superposition theorem. Determine value of I_1 using it in a network of figure given below. 6

- (B)** State and prove maximum power transfer theorem for DC circuits. 6

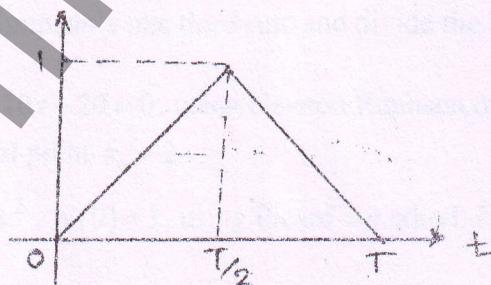

OR

- Q.4 (A)** State Norton's theorem. Find Norton's equivalent network across the terminal AB of the network shown below. 6

- (B)** Explain initial value theorem and final value theorem. 6

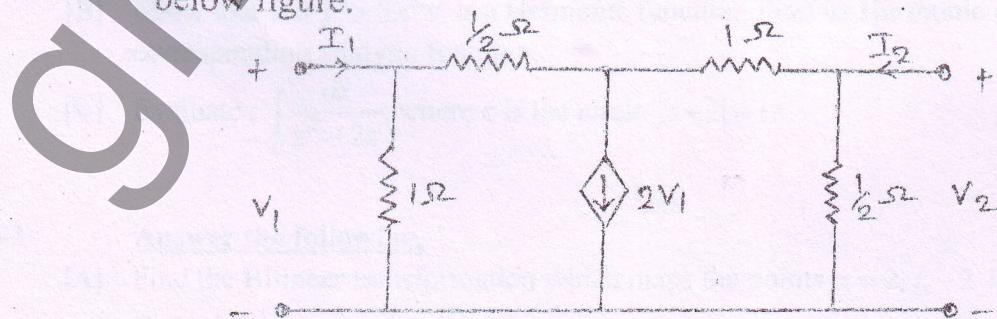

- Q.5 (A)** Obtain $V(S)$ of the given waveform in figure below. 6

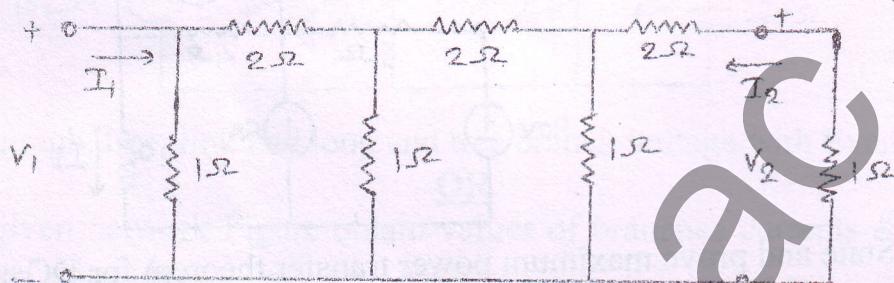

- (B)** Obtain Z-parameters in terms of Y-parameters. 5

OR

- Q.5 (A)** Find z-parameter for resistive network containing a controlled source as in below figure. 6

- (B) For the resistive two port network of given figure, determine the numerical values for G_{12} , α_{12} , Z_{12} , Y_{12} . 5

- Q.6 (A) Define laplace transformation and inverse laplace transformation. Derive 6
laplace transformation of unit step and exponential function
- (B) Explain shifting and scaling theorem with proper example. 4
- (C) Explain concept of complex frequency. 2

End Of Paper
