GANPAT UNIVERSITY M. Tech. (CE/IT) SEMESTER – I EXAMINATION I – JAN 2013 3CE102/3IT102: Computational Intelligence

	[Time: 3 Hours			Total Marks: 70]	
Instri	uctions			B	
		igures to the right indicate full marks.			
	2. E	ach section should be written in a separate answer book.			
	3. B	e precise and to the point in your answer.			
		point in jour this wor. Manoo grish garwollo.	(A)		
		SECTION - I			
Q-1	Ans	wer Followings:			
101	(A)	Explain Tic-Tac-Toe problem in AI.		161	
	(B)	Discuss with an example "Is the solution a state or path?"		[6]	
		an example 13 the solution a state of path?		[6]	
Q-2	Ansv	wer Followings:			
	(A)	Explain TSP problem in AI.		161	
	(B)	Explain backward chaining with an example.		[6]	
		C// Contract of the Contract o		[5]	
		Care Oct no OR			
Q-2					
V-2		To all the second secon			
Q-2			Vaithar	161	
Q-2	(A)	You are given two jugs of water. A 3-gallon jug and 4-gallon jug. 1	Neither	[6]	
Q-2		You are given two jugs of water. A 3-gallon jug and 4-gallon jug. has any measuring marker on it. We can fill the water from outsour	ce	[6]	
101		You are given two jugs of water. A 3–gallon jug and 4-gallon jug. I has any measuring marker on it. We can fill the water from outsour pump. How can we get exactly 2-gallons of water into the 3-gallon	ce		
		You are given two jugs of water. A 3-gallon jug and 4-gallon jug. I has any measuring marker on it. We can fill the water from outsour pump. How can we get exactly 2-gallons of water into the 3-gallon Define a problem of Water Jug as a State Space Search.	ce		
	(A) (B)	You are given two jugs of water. A 3-gallon jug and 4-gallon jug. I has any measuring marker on it. We can fill the water from outsour pump. How can we get exactly 2-gallons of water into the 3-gallon Define a problem of Water Jug as a State Space Search. Explain Best First Search with example.	ce jug.		
[6]	(A) (B)	You are given two jugs of water. A 3-gallon jug and 4-gallon jug. It has any measuring marker on it. We can fill the water from outsour pump. How can we get exactly 2-gallons of water into the 3-gallon Define a problem of Water Jug as a State Space Search. Explain Best First Search with example.	ce		
[6]	(A) (B)	You are given two jugs of water. A 3–gallon jug and 4-gallon jug. I has any measuring marker on it. We can fill the water from outsour pump. How can we get exactly 2-gallons of water into the 3-gallon Define a problem of Water Jug as a State Space Search. Explain Best First Search with example. ver Followings: Discuss recoverable Class of Problem with an example.	ce jug.	[5]	
[6]	(A) (B) Ansv	You are given two jugs of water. A 3–gallon jug and 4-gallon jug. I has any measuring marker on it. We can fill the water from outsour pump. How can we get exactly 2-gallons of water into the 3-gallon Define a problem of Water Jug as a State Space Search. Explain Best First Search with example. ver Followings: Discuss recoverable Class of Problem with an example.	ce jug.	[5] [6]	
[6]	(A) (B) Answ (A)	You are given two jugs of water. A 3-gallon jug and 4-gallon jug. It has any measuring marker on it. We can fill the water from outsour pump. How can we get exactly 2-gallons of water into the 3-gallon Define a problem of Water Jug as a State Space Search. Explain Best First Search with example.	ce jug.	[5]	
Q-3	(A) (B) Answ (A) (B)	You are given two jugs of water. A 3–gallon jug and 4-gallon jug. It has any measuring marker on it. We can fill the water from outsour pump. How can we get exactly 2-gallons of water into the 3-gallon Define a problem of Water Jug as a State Space Search. Explain Best First Search with example. Ver Followings: Discuss recoverable Class of Problem with an example. What is Propotional Resolution? Discuss it with an example.	ce jug.	[5] [6]	
Q-3	(A) (B) Answ (A) (B)	You are given two jugs of water. A 3–gallon jug and 4-gallon jug. It has any measuring marker on it. We can fill the water from outsour pump. How can we get exactly 2-gallons of water into the 3-gallon Define a problem of Water Jug as a State Space Search. Explain Best First Search with example. Ver Followings: Discuss recoverable Class of Problem with an example. What is Propotional Resolution? Discuss it with an example. OR	ce jug.	[5] [6]	
Q-3	(A) Answ (A) (B) Answ (A)	You are given two jugs of water. A 3–gallon jug and 4-gallon jug. It has any measuring marker on it. We can fill the water from outsour pump. How can we get exactly 2-gallons of water into the 3-gallon Define a problem of Water Jug as a State Space Search. Explain Best First Search with example. Ver Followings: Discuss recoverable Class of Problem with an example. What is Propotional Resolution? Discuss it with an example. OR Ver Followings: Discuss the problems of AI	ce jug.	[5] [6] [6]	
2-3	(A) (B) Answ (A) (B)	You are given two jugs of water. A 3–gallon jug and 4-gallon jug. It has any measuring marker on it. We can fill the water from outsour pump. How can we get exactly 2-gallons of water into the 3-gallon Define a problem of Water Jug as a State Space Search. Explain Best First Search with example. Ver Followings: Discuss recoverable Class of Problem with an example. What is Propotional Resolution? Discuss it with an example. OR Ver Followings: Discuss the problems of AI Consider the following sentences:	ce jug.	[5] [6]	
2-3	(A) Answ (A) (B) Answ (A)	You are given two jugs of water. A 3–gallon jug and 4-gallon jug. It has any measuring marker on it. We can fill the water from outsour pump. How can we get exactly 2-gallons of water into the 3-gallon Define a problem of Water Jug as a State Space Search. Explain Best First Search with example. Ver Followings: Discuss recoverable Class of Problem with an example. What is Propotional Resolution? Discuss it with an example. OR Ver Followings: Discuss the problems of AI Consider the following sentences: John likes all kinds of food.	ce jug.	[5] [6] [6]	
2-3	(A) Answ (A) (B) Answ (A)	You are given two jugs of water. A 3-gallon jug and 4-gallon jug. I has any measuring marker on it. We can fill the water from outsour pump. How can we get exactly 2-gallons of water into the 3-gallon Define a problem of Water Jug as a State Space Search. Explain Best First Search with example. Ver Followings: Discuss recoverable Class of Problem with an example. What is Propotional Resolution? Discuss it with an example. OR Ver Followings: Discuss the problems of AI Consider the following sentences: John likes all kinds of food. Apples are food.	ce jug.	[5] [6] [6]	
2-3	(A) Answ (A) (B) Answ (A)	You are given two jugs of water. A 3-gallon jug and 4-gallon jug. It has any measuring marker on it. We can fill the water from outsour pump. How can we get exactly 2-gallons of water into the 3-gallon Define a problem of Water Jug as a State Space Search. Explain Best First Search with example. Ver Followings: Discuss recoverable Class of Problem with an example. What is Propotional Resolution? Discuss it with an example. OR Ver Followings: Discuss the problems of AI Consider the following sentences: John likes all kinds of food. Apples are food. Chicken is food.	ce jug.	[5] [6] [6]	
2-3	(A) Answ (A) (B) Answ (A)	You are given two jugs of water. A 3-gallon jug and 4-gallon jug. I has any measuring marker on it. We can fill the water from outsour pump. How can we get exactly 2-gallons of water into the 3-gallon Define a problem of Water Jug as a State Space Search. Explain Best First Search with example. Ver Followings: Discuss recoverable Class of Problem with an example. What is Proportional Resolution? Discuss it with an example. OR Ver Followings: Discuss the problems of AI Consider the following sentences: John likes all kinds of food. Apples are food. Chicken is food. Anything anyone eats and isn't killed by is food.	ce jug.	[6] [6] [6]	
Q-3	(A) Answ (A) (B) Answ (A)	You are given two jugs of water. A 3-gallon jug and 4-gallon jug. I has any measuring marker on it. We can fill the water from outsour pump. How can we get exactly 2-gallons of water into the 3-gallon Define a problem of Water Jug as a State Space Search. Explain Best First Search with example. Ver Followings: Discuss recoverable Class of Problem with an example. What is Propotional Resolution? Discuss it with an example. OR Ver Followings: Discuss the problems of AI Consider the following sentences: John likes all kinds of food. Apples are food. Chicken is food. Anything anyone eats and isn't killed by is food. Bill eats peanuts and is still alive.	ce jug.	[6] [6] [6]	
	(A) Answ (A) (B) Answ (A)	You are given two jugs of water. A 3-gallon jug and 4-gallon jug. I has any measuring marker on it. We can fill the water from outsour pump. How can we get exactly 2-gallons of water into the 3-gallon Define a problem of Water Jug as a State Space Search. Explain Best First Search with example. Ver Followings: Discuss recoverable Class of Problem with an example. What is Proportional Resolution? Discuss it with an example. OR Ver Followings: Discuss the problems of AI Consider the following sentences: John likes all kinds of food. Apples are food. Chicken is food. Anything anyone eats and isn't killed by is food.	ce jug.	[5] [6] [6]	

SECTION - II

0-4	(A)	What is constraint satisfaction? Solve the following problem.	[6]
	()	B E S Tomernomo	[0]
		+ M A D E	
	Marks	ListoT Total	
		MASER	
	(B)	Discuss in detail how to design the system. Represent the problem of chess	[6]
		as a State Space Search.	
		Short seeing should be written OR assisted blands on the control of	
Q-4	(A)	Solve following using constraint satisfaction.	[6]
		CROSS	
		+ R O A D S	
		DANGER	0
	(B)	Consider the following sentences.	[6]
		i) John was a man. Monthlos satisfies (a)	
		ii) John was a pompein.	
		iii) John was born in 40 AD.	4-0
		iv) All men are mortal.	
		v) All pompein died in 79 AD.	
		vi) Volcano erupted in 79 AD.	
		vii) No mortal lives greater than 150 years.	
	1	viii) It is now 1991.	1-0
	rons	ix) Alive means not dead.	
		x) If someone dies, then he is dead at all later times.	
		Solve John is alive now by using Resolution.	
Q:5	(A)	Discuss various activation functions used in neural network.	[6]
ici	(B)	Compare Biological Neural network with Artificial Neural Network.	[3]
		Paragraph of the contract of t	
	(C)	Define the following terms	[2]
		(i) Unsupervised Learning (ii) bias	
		OR	
Q:5	(A)	Develop a perceptron for following 7 input samples with n=1 and initial	[6]
		weights and bias 1.	4_0
		Class 1: (3, 1), (4, 2), (5, 3), (6, 4)	
181		Class 2: (2, 2), (1, 3), (2, 6)	
	(B)	Discuss various Neural network architecture briefly.	[5]
Q: 6	(A)	Explain Backpropagation training algorithm and also mention its merits and	[8]
		demerits	[0]
	(B)	Justify fuzziness is not probability.	[2]
		Bill eats peanuts and is still alive.	
-	(C)	Given $f(x)=x^2$, find $f(A)$ by extension principle for the following fuzzy set	[2]
	(0)	$A=\{0.1/1, 0.2/-1, 0.2/2, 0.4/-2, 0.3/3\}.$	1-1
